

Lesson learned

1. It is possible to change
2. It is compulsory to use ICT better than before
3. We need to improve problem solving attitude
4. The role of EU projects
 - a. Good excuse to make innovative experiments
 - b. Good to motivate to learn languages
 - c. Good to motivate to change and to innovate
 - d. Perfect energizer for teachers and students
 - e. Perfect lesson to spread the sense of Europe and of being Europeans

What we must do:

- To go online
- To use creativity
- To use problem solving attitude
- To Teach teachers to use ICT/new methodologies/ new tools
- To improve adult training changes (we must not go back to face to face training only)
- To educate for their future not for our past
- To stimulate curiosity
- To create plans for base technology literacy (and education) for animators and trainers.

What is needed to transform face to face teaching in blended learning/flipped learning/learning by experience?

And why to do it?

In conclusion: Never underestimate a teacher!

Teacher were able to change even with no time and no tools!!!
